unterseite der Platte vornehmen.

150mm

The diagram shows a technical drawing of a drilling template. It features a green outline of the template's shape, which includes a top-left corner with two rectangular cutouts, a bottom-left corner with three rectangular cutouts, and a bottom-right corner with a curved cutout. Two small circles represent drill holes. One hole is located near the top-left corner, and the other is near the bottom-left corner. A horizontal dimension line with arrows at both ends is positioned above the bottom-right hole, indicating a distance of 150mm from the right edge of the template to the center of the hole. The text '150mm' is written above this dimension line.
